At what companies were you employed?
I was an intern with ABC7 and currently with NBC4.

Where were you located?
I was located in Chicago for the ABC7 internship and am currently located in Columbus for the NBC4 internship.

What was your position?
My position for both was a weather intern.

What were the main tasks involved with your internship?
Each day, I would forecast the weather by looking at trends and patterns within the atmosphere. Then, I would design the graphics to be used on-air for the meteorologists to use. On certain occasions, I was in charge of social media (especially during severe weather outbreaks). I would also help out at different events. For example, at ABC7, I was part of the storm team promo tapings that would be used in commercials across the Chicagoland area. For NBC4, I help out at the high school football games every Friday. Finally, I always practice doing a radio segment as well as a weather broadcast in front of the big screen.

What were the highlights of your internships?
The highlights of my internships were learning from the best of the best. It was truly an honor to work with such talented and intelligent people on a daily basis. Everyone at each internship was so friendly and truly wanted me to find success in this field. In addition, I gained the skills necessary to be an on-air meteorologist. Without these internships, I would not have learned the skills needed to pursue a job in this field.
