

2021 DISTINGUISHED SENIOR

“Changing the focus of my project [due to the pandemic] was difficult, but it was also a learning experience because it helped teach me how to adapt to situations outside of my control.”

My internship taught me a lot about how we can improve the way that we plan and develop areas to be more sustainable and equitable.

I attended the Nobel Dialogue, which was an event where experts in all sorts of fields came together to discuss current issues and new breakthroughs.

I met great people through the English Conversation Program which helps international students improve their spoken English through casual conversations.
