

2021 DISTINGUISHED SENIOR

“Presenting my research at the Society for Freshwater Sciences conference this past summer was the first time I truly felt like a scientist. This really helped me become more confident in myself and not just view my successes in college as happenstance, but instead as things that I have worked hard for and deserve.”

Doing field research during my Freshman year gave me first hand exposure to the real-world applications of my chosen field of study.

I worked in the Stream and River Ecology Lab since my Freshman year, both as a research technician and conducting my own research.

At the Ohio EPA Division of Surface Water I became knowledgeable in taxonomic identification of fish and macroinvertebrates.
