

2021 DISTINGUISHED SENIOR

My internship at Mapfre Stadium developed my skills as a young grounds person.

I attended multiple industry conferences and connected with many professionals in the industry.

At the OSU turf plots, I developed the skills needed to move into professional sports turf management.

“During my internship abroad at Everton FC, a professional soccer club in Liverpool England, I facilitated in the management of Premier League first team training pitches which included three full size, natural grass, fiber sand fields reinforced with a Desso fiber hybrid system as well as an additional designated goalkeeper area.”
