

2021 DISTINGUISHED SENIOR

“For me, the experience that bears [the greatest] sense of accomplishment is one that permeates through many facets of my life. The application of the knowledge I have amassed throughout my time at Ohio State is that experience.”

At UC Davis, I worked with graduate students and professors to organize experiences surrounding gene editing and engineering in livestock.

I have been involved in a variety of research experiences ranging from Parasite Resistance Study, Impacts of personality on animal welfare, and others.

As the Environment and Natural Resources Scholars co-chair, I led leadership council meetings to increase recruitment and retention.
