

## 2021 DISTINGUISHED SENIOR

“I am so fortunate to have had the opportunity to take classes at the wetlands and be able to learn skills you just can’t teach in a classroom. Even just learning how to cross a stream safely without falling in and flooding your waders is something I would not have wanted to learn on the job!”

Nothing compares to going out in the wetlands and learning how to measure stream velocity or which gear is best for catching invertebrates.

Being a part of the Zero Waste team that keeps the OSU Stadium the largest zero waste stadium in the nation was wonderful.

Interning at the Office of Energy and Sustainability Services, I learned how to reduce water usage in different types of buildings.
