

2021 DISTINGUISHED SENIOR

“I’m not sure there is one experience, class, or moment that defines my greatest sense of accomplishment, but I am extremely proud of everything I have accomplished over the last four years, which makes it hard to pick just one thing.”

I traveled to Scotland and studied small ruminants and other food animal species. I met researchers, farmers, and veterinarians.

I performed surveillance testing, sample collection, and analysis of Reovirus events in turkey finisher flocks as a veterinary services intern.

After working toward it for six years, I was able to compete on the poultry judging team against students across the nation.
