

2021 DISTINGUISHED SENIOR

I worked with some of the most prominent leaders in the central Ohio region as part of my internship with Smart Columbus.

I worked as an Inclusion and Outreach Coordinator in SENR to recruit and retain underrepresented minority students in our academic unit.

I have assisted multiple research projects: with Dr. Hamilton; the SENR honors program; and the Doris Duke Conservation Program at University of Michigan

“Reach out and ask for research opportunities, internship opportunities, and mentorship because there is always someone out there willing to help you in moments you’re struggling and there are even more people around to celebrate you when you get your wins.”
