

2021 DISTINGUISHED SENIOR

“While applying to graduate schools, I reached out to many professors from various schools to find the perfect program match. Every single person I talked to commented on how excited they were to see that I had previous research experience and I believe it inevitably was a main factor in my eventual acceptance to graduate school.”

I learned how to conduct lab protocols such as genomic DNA extraction, PCR, cell culturing, and protein assays in Drs. Lee and Jacobi's lab.

I worked on an outreach program for high school students as part of the Animal Science Community Alliance's departmental leadership team.

I gained experience in taking care of quail at the OSU poultry barn, weaning and feeding piglets at the swine facility, and other skills.
