

2022 DISTINGUISHED SENIOR

I worked as a field technician studying birds for wildlife refuges and universities in Montana, Arizona, and Kentucky.

I was the Research Coordinator of the Ornithology Club at Ohio State for three years.

I will continue my field work studying birds in central Nevada's Great Basin this summer.

“I loved the experience of getting to go out and explore such a wild area every day [in Montana], while contributing to research that will help scientists implement habitat management policies to conserve threatened species.”
