

2022 DISTINGUISHED SENIOR

I traveled the country as a member of a chainsaw crew with American Conservation Experience, a nonprofit conservation corps.

I conducted two independent research projects examining snake sampling techniques and presented my findings at the 2021 OHIO PARC Conference.

I am currently employed as a Biological Field Technician with the USDA-ARS after starting as a lab assistant my freshman year.

“I recalibrated my approach to life, redefining what it meant to chase my joy and came to realize that I am happiest when each day is spent engaging my mind and body for the greater goal of conservation.”
