Major _____

This minor is intended primarily for students whose career plans include farming and/or employment with large production units or front line companies and agencies providing goods and services to production agriculture. It provides the student with the opportunity to acquire skills and knowledge about production agriculture that complement those being acquired through majors such as Agribusiness and Applied Economics, Agricultural Systems Management, Animal Sciences, Sustainable Plant Systems, Agricultural Science and Extension Education who have an interest in production agriculture.

For this minor the student will select at least 15 credit hours of course work. These courses will be selected from at least two of the areas listed below excluding those from the department in which the student's major resides.
