

## 2020 DISTINGUISHED SENIOR

“During my college career I realized that excellence and distinction were something that every student in Ohio State has achieved through attending this great university, making it that much harder for a student to be successful among such prominent peers. This provided me with the determination to work that much harder to help myself and those around me to achieve the success each of us has dreamed.”

I worked in agronomy, research and machinery through my internships with Mercer Landmark, the Kenn-Feld Group and 3k. Precision Planting.

I continued to work at my family's farm while enrolling full-time at Ohio State.

I studied abroad in Brazil, where I studied agriculture and toured their agricultural industry.
