

2020 DISTINGUISHED SENIOR

“My greatest sense of accomplishment came with completing my undergraduate research project. It was extremely fulfilling and gave me a huge sense of accomplishment. I was able to look in-depth at human perceptions, sense of smell, and the impact these have on food and food choices. Through this, I discovered my passion for sensory science.”

During my five internships I had opportunities to help shape many consumer-facing products.

I co-authored published research on the olfaction of fruit flavors.

My team won regionally and placed second nationally for the Food Technologist's College Bowl Competition.
