

2020 DISTINGUISHED SENIOR

“One of my most valuable learning experiences was in a Food Additives class that I took during the spring semester of my Junior year. I learned a lot of great information during this class and was able to connect it with my other classes as well.”

I was able to intern with different development projects throughout J.M. Smucker Company's product line.

As a sophomore, my team won second place at BakingTech in Chicago against mostly graduate students.

As co-president of the Food Science Club I organized the Farm Science Review fundraiser and annual department Thanksgiving lunch.
