

2020 DISTINGUISHED SENIOR

I pursued my own research in Jersey calf nutrition, which was a two-year study.

I interned at the OSU Equine Center in reproduction, where I learned equine management, detecting heat, and how to ultrasound mares.

I was the treasurer for Towers Agricultural Honorary, the Animal Science Community Alliance and the Animal Sciences leadership team.

“The most valuable experience I have had during my college career was learning to take time for myself. I learned that it is important and okay to take a break from both the social and academic aspects of college.”
