

2020 DISTINGUISHED SENIOR

I am employed as a testing technician for the US Equestrian Federation; conducting random drug tests of horses competing in USEF events.

I volunteered with 4 Paws for Ability as trainer for service animals

As an intern I assisted with blood sample collection and testing and was able to travel to Lexington, KY for research.

“When the challenges and obstacles seemed insurmountable, I was determined to work that much harder. My greatest accomplishment is being accepted to The Ohio State University College of Veterinary Medicine and discovering that knowledge, experience, and determination can make any goal achievable.”
