

2020 DISTINGUISHED SENIOR

I worked at the Environmental and Social Sustainability Lab for four years, focused on water quality issues.

As president of the Sierra Club Student Coalition, I led the coalition in advocacy, outreach and outings.

I worked as a research assistant during my entire degree which led to a position to recommend research-based policy suggestions to federal agencies.

“My most valuable experience in undergrad came with my journey as a research assistant where I learned to have confidence and trust in my ability to pursue new challenges.”
